

2024

Mayor Max and the Mayors of Idyllwild

They're amazing! 

From the Office of Mayor Max! Welcome to 2024!

When I, Phyllis Mueller, first heard of the idea of a Mayoral election to elect a dog or a cat as Idyllwild's first Mayor, it touched my heart, and I knew that I would make every effort to win the election. I had no idea what it would entail at the time, but I just knew I had to go for it.

It is such an honor to be the Mayor of a town, and I realized immediately it would mean the Mayor's Office and initiatives could be fun, non-partisan, and non-political. I decided we would just do kind and loving things for everyone with whom we come in contact. Now that is an office worth running for, and I went for it with all my heart. I decided to ask the town what they wanted from a Mayor's office, and I began with the business owners. They were very consistent saying their businesses were often struggling, and they needed more business and tourism in town. I made a plan to make that happen, and I have implemented it.

MM3 and Meadow

Mayor Max the Third

We are now in the middle of our 12th year, and it is such a joyful thing for us to do. We have loved every minute of it! Since the start of our first term as the Mayor of Idyllwild, California on July 1, 2012 and to date, we have personally met with more than one million people. With the Mayor's social media presence, we have reached millions of people around the globe.

The Mayors attend and participate in all kinds of events, and here's just a small sampling of the kinds of events and activities that we do:

Animal Blessing Events
Animal Rescue Events
Anniversary Parties
Art & Wine Walk Events
Assisted Living Visits
Bachelor Parties
Bachelorette Parties
Birthday Parties
Business / Store Events
Charity and Holiday Events
Daily Visits Downtown
Fund-Raising Events

Grand Openings
Grief and Suicide Outreach
Halloween Festivals
Harvest Festivals
Hospital Visits
House Visits at Your Home
Library Events
Litter Pick-Up Events
Parades
Parties of Any Type
Public Visiting

Reading Programs
Reaching Out to Those in Need
Ribbon Cuttings
School Programs
Special Events (All Kinds)
Special Guests in Town
Training Programs
Tree Lighting Events
Visits at the Mayor's Home
Weddings
And more!

(L to R) Deputy Co-Mayors Mitzi and Mikey

You can also call and arrange a private visit with the Mayor, and we do our best to accommodate everyone.

Our regular downtown visits with residents and visitors bring happiness every day. Saturdays and Sundays, we are downtown at 2 PM, Thursdays and Fridays at 4 PM, and Mondays through Wednesdays are by appointment. Whenever possible, we do try to coordinate events toward the end of the day on Mondays through Fridays since my husband and I work for a living. We try to preserve as much of the workday as possible. But we never say “no” to a visit.

In addition to our downtown visits, we have also done more than 1600 visits at our home. This is mainly because the regular downtown visiting schedule does not always work for everyone. Sometimes people just find out about us and they call the minute they are leaving Idyllwild. They ask if they can see the Mayor in 10 minutes! This is the toughest type of visit to accommodate, but we always try to make it happen. When we cannot leave work, we invite the visitors to the Mayor’s home.

We love creating joy, and the Mayors are just so good at doing that for people. We can see that we elevate the spirits of people, and we have received many thousands of responses and comments from people thanking us for the continual joy we create and bring to their lives. The joy we create extends as well to the Mayor’s social media presence. From thousands, here is one of my favorite comments we received this year:

All the depression, anxiety, all the bad pain of life comes to this place and ends.

To arrange a visit with the Mayor, call me, Phyllis, at 949-525-0100 at any time. We will arrange the visit. You can also email us at max@mayormax.com. We will get back with you right away. We have had people visit us from all over the world.

Thank you for being part of our lives. We love you and we can’t wait to see you and/or hear from you!

Love always,

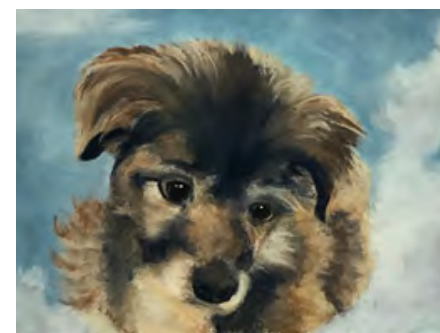

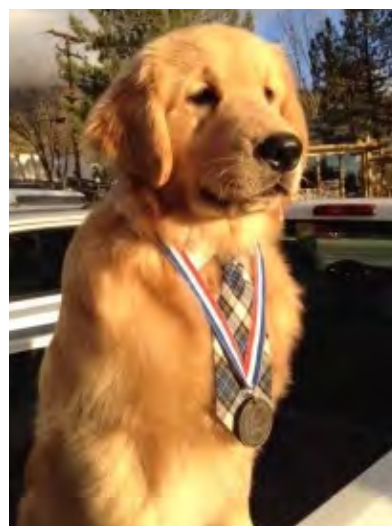

Phyllis Mueller
Chief of Staff

2024 Mayor Max Calendar Printing Cost Contributors

The Office of Mayor Max has created an annual calendar since 2014 that has been entirely funded by the Mayor's Chiefs of Staff, Phyllis Mueller and Glenn Warren. For the 2024 Mayor Max calendar, we did outreach for the second time to request some financial assistance with the printing costs that have continued to increase substantially.

Listed here are the people, businesses, and organizations that contributed toward the cost of the printing of the 2024 calendars. These contributors made it possible for us to produce the 2024 calendars. When you see them, please thank them and support these businesses and organizations in every way possible. We are deeply grateful for the support of everyone that has helped.

Highlights of the Year!

The Mayors of Idyllwild generate a great deal of media exposure every year, they attend hundreds of events, and meet thousands of people. 2023 was a very busy year, and in this section, we are providing a small sampling of some of the accomplishments.

To mention only a few:

Daily Downtown Visits with the Public
Visits at the Mayor's Home
Guests of Honor at Many Weddings
The Welcome Party and Birthday Party at Mountain Paws
PCT Hiker Visits March through June
Astro Camp Visits
Visits at Silver Pines Lodge
Troy Camp at Idyllwild Pines
Town Hall Events
Bachelor and Bachelorette Parties
Multi-day Interview with *L.A. Times* Journalist Mel Melcon
Lee Michael Krieger of Soul Sustainable Adventure Group
Camp Maranatha for a Foster Children Event
Ribbon Cutting at Recht Gallery
Highland Palms Neighborhood Visit
Fishing Season Launch at Thousand Trails
Boy Scouts at Camp Emerson
Visit with Assemblymember Greg Wallis
Path to Wellness – Oakwood Village
Meadows Fest at Idyllwild Arts
LifeStream Blood Bank at Idyllwild Fire Station
FWB Festival at Idyllwild Arts
Visit with Women Veterans at Spirit Mountain
Historical Society Event
Documentary Crew at MM3 and Meadow Birthday Party
Idyllwild Library Book Faire at Idyllwild Park
Alex Robins (playwright from England)
Mayor Max on the TODAY All Day Show
Australia Radio
Animal Blessing at St. Hugh of Lincoln Episcopal Church
WGN (Chicago) TV Morning Show
Bill Niedzwiecki and Animal Liberation Wave from Korea
Riley Mandell and Ben Bailey Documentarians
Brazilian TV, Fábio Borges
Mountain Disaster Preparedness at Idyllwild Fire Department
Rotary Social
California State Senator Seyarto at Idyllwild Fire Department
Garage sale, Elzbieta Anna Machowska
SFGATE Publication, Christine Hitt Interviews Mayor Max
Idyllwild Halloween Festival
Psi Upsilon Fraternity from Pepperdine University Litter Pick-Up
Family Fun Night at Valle Vista Library
Tree Lighting Ceremony

(L to R) Ben Bailey, Glenn Warren, Phyllis Mueller, and Riley Mandell. Ben and Riley flew in from Notre Dame University to make a documentary about Mayor Max.

Wildflower PCT Hiker with Vice Mayor Meadow

Playwright Alex Robins came from the UK to write a play about Mayor Max

Certificate of Recognition presented to Mayor Max and Vice Mayor Meadow by Greg Wallis, 47th Assembly District, California State Legislature

(L to R) Cody Sylvester, Devan Sylvester, and Jake Sylvester from Devan Shae Media making a documentary about Mayor Max

PCT Hikers at the Bunkhouse. The Mayors see many hundreds of hikers every year, March through June.

Mountain Disaster Preparedness Team and the Idyllwild Fire Department with Mayor Max and Vice Mayor Meadow

Peace on Earth Team – POET

Hello everyone!

We the People can create Peace on Earth by taking positive actions and using only positive energy as the method of handling any situation. It is positive energy that leads towards life.

No matter what happens, it is our job, each of us, to create a better world with more joy and happiness for everyone, and to take the position that we can be the ones to have a positive impact and make a difference.

There is never a reason to wait for others to create the environment in the world that you would like to see.

While there are times when things can seem insurmountable, I believe things are only insurmountable when we take on that viewpoint. I believe the way to help the world, to be happy, to be able to expand and thrive in challenging times, is to realize there is always something that you can do about any situation, no matter what it is.

Negative energy can be seductive and lead to a downward spiral of misery and plummeting morale. This process can be reversed in an instant by taking a responsible and causative position about anything and then taking positive action. Negative energy equals unhappiness. Positive energy that you can be cause over and can willfully create at any time leads to happiness.

When you have something to say, say it from love. Cruelty, meanness, criticisms, hatred, war begets the same in return. Negativity worsens conditions and harms yourself and others. You help the world and everyone in it by being kind and loving. You can always get your point across, but just do it with loving positive energy.

Photo by Cara Addis

We currently have 300 living angels that have come forward and let us know that they are part of this program, to do their best to be living angels on Earth and to help create Peace on Earth. I would like your help in greatly expanding that number. I believe we can do it, and I am asking for your help, first as a Level 1 living angel and then as a Level 2.

There is always something you can do about any situation. I even believe that any time something bad happens, we can heal it by immediately creating so much good that it outweighs the bad by magnitudes. We can convert negative energy by emanating and creating massive amounts of positive energy, love, and actions.

Join the Peace on Earth Team

To join Mayor Max's Peace on Earth Team and Living Angel initiative, contact me by telephone at 949.525.0100 or email at max@mayormax.com.

Start today by working on Level 1. Thank you!

Love always from your dear and devoted friend forever,

Phyllis Mueller
Creator of POET
Chief of Staff for the Mayors of Idyllwild

**Positive Energy
Leads Towards Life**

Be a Living Angel on Earth

LEVEL 1

You are part of the Mayor's Level 1 Peace on Earth Team when you are doing your best to act like a living angel on Earth using only positive energy and love in everything you think, do, and say. You do not have to be perfect at this, but you are making the commitment to continually try to be loving, and when you find yourself being negative, you notice it and change your behavior to love.

Peace on Earth Team
POET

Be a Living Angel on Earth
You Can Help

Be a Living Angel on Earth

LEVEL 2

You are part of the Mayor's Level 2 Peace on Earth Team when you get others to work on being a living angel on Earth. You gently correct people when you observe they are being cruel, critical, or mean for any reason even if it seems warranted that they do that. You help get the word out to people on the importance of being loving, and you help them to stay continually focused on improving their ability to be positive and loving people. A Level 2 Living Angel works on themselves for the rest of their life but also gets others to do the same. A Level 2 helps to increase the number of living angels on this planet.

The Mayors of Idyllwild and Staff deputize parents, children and their pets by giving out the Mayor's ties. When we do this, we introduce them to our Peace on Earth Team program by saying this:

This tie now makes you and your family part of the Mayor's Peace on Earth Team where we ask you to use only positive energy and love as the basis for everything you think, do, and say. And that is already happening naturally when it's easy. The trick is to also do this when it's hard. So the next time you want to clobber somebody or be mean or get even, we ask you to hold back and wait it out until you can have a loving heart about it and speak only from love. The world does not need any more negative energy. It has enough of it. Positive energy leads towards life. Negative energy goes in the opposite direction.

We ask you to do your best to be a living angel on Earth, and we thank you for all the good work you will do in this lifetime. Thank you for being on the Mayor's Peace on Earth Team!

The Story of Purity and Mr. Ed: Two Bees Who Set Out To Save the World

Photo by Christine Rheaume

This is the story of Purity and Mr. Ed, two bees who set out to save the world.

Purity and Mr. Ed are two very special bees. This is the story of their bold adventure as they devote their lives to helping save mankind with a very forward-thinking strategy.

Purity and Mr. Ed met at Baby Bee School located in several bee boxes in Hemet, California off of Highway 74. From the earliest of ages, baby bees attend Baby Bee School where they listen to lectures from the most knowledgeable bee expert in the colony who is responsible for baby bee training. This teacher was famous for creating quips that were easy for baby bees to remember for the rest of their lives. An entire lesson was contained in a quip. Here are a few examples:

Bee Training Quips

- **You Will Thrive in the Hive**—A lesson on staying close to home in the bee boxes and pollinating the flowers and trees in the acres nearby
- **Be Kind or Be in Heaven**—This is a reference to stinging. Every bee has a bee stinger but they are always in shut-off mode so that all stingers are automatically in the no-sting mode. However, should a bee lose his temper, that bee will sometimes sting someone which is an automatic go-to-Heaven card for the stinging bee. Bees are taught to be kind and loving at all times, and most of the bees are very successful at that.

Sometimes bees will make a sacrifice of themselves. There is the legend of BillyBee and his Buddies who saved a child from an attacking dog. BillyBee and his Buddies stung the dog several times causing it to whimper and leave, and no harm came to the child. BillyBee and his Buddies all went to Heaven. This story is taught to every baby bee. As a result, most bees today are named after BillyBee or they are also named Buddy!

Most of the female bees are named Honey, Sweetie, or SugarBee. But Purity was an exception. From the day she was born,

everyone noticed that the spirit of Purity was so kind and loving that it stood out. You noticed immediately that there was a special grace and gentleness to her soul. It was so noticeable, in fact, that the main Bee In Charge (BIC) convened a meeting with all the adult bees and suggested her name be Purity. And everyone agreed it was a perfect name for her.

- **Don't Be a Stallin', Go Get the Pollen**—This is a lesson in productivity and getting as much done in a day as possible. Synonymous with this is the reference to being "busy as a bee!" All bees know that the more productive they are, the happier they are, and the higher their morale is.
- **Capture the Power of the Flower**—This is a reminder to all bees about the importance of their jobs to pollinate flowers and trees and to make honey. The bees know that mankind and most all of the Earth's other creatures depend upon the bees and their productivity in one way or another. All bees take pride in their work and have a keen sense of duty.
- **Stay Together in Any Foul Weather**—This is a reference to remind bees to stay inside in foul weather. On bad weather days, this quip is accompanied by its companion saying, You're Safe When You Roam Inside the Honeycomb.
- **Stay Humble, Respect the Bumble**—This is a reference on manners to always be respectful, kind, and loving towards your fellow bees and all other life forms. There is never a reason to be unpleasin'!

All the bees were also taught the powerful process of how to bring your thoughts into reality by focusing your mind on that which you want to make happen. This is the poem that teaches the process of being cause over life:

CAUSE OVER LIFE

*That which you can conceive and believe
And hold in your thoughts with certainty
Will come to be, you will see
And so it has been for eternity*

*The key is to fully believe
And not vacillate with uncertainty
But total intention is the key
And so it has been for eternity*

*No one knows this better than bees
Who fully know their LMNOPs
They bring life every day to all humanity
And so it has been for eternity*

PURITY'S AND MR. ED'S BEACH ADVENTURE

When Purity and Mr. Ed were kids, one time, Mr. Ed kept smelling something wonderful and he kept following his nose for miles. He finally found what he was smelling, and it turned out to be a really sweet strawberry pie that was on a picnic table at the beach. The pie was sitting in the open air uncovered on

a picnic table with a red and white checkered tablecloth. Somehow, the beautiful red strawberries and the red and white checkered tablecloth were just too much for Mr. Ed's senses, and he flew in too quickly to taste the delicious strawberries that had been made with a honey purée.

Mr. Ed misjudged his descent and got some of his wings stuck in the strawberry filling and he couldn't get out. Mr. Ed became immediately concerned that humans might find him which would be a problem, so he asked Purity to try to find some help.

Purity rushed out and started calling for help. Within two minutes, a large group of beach bees heard her calls and came to assist. The beach bees all approached Mr. Ed, and by hovering and without touching the pie, they began licking the strawberry filling off of Mr. Ed's wings until Mr. Ed's wings were free from the sticky substance. The beach bees were very careful not to get stuck themselves, but they did find the strawberry filling to be delicious.

It all ended safely for everyone. The humans were playing on the beach and didn't notice the incident. Mr. Ed learned a lesson going forward, and he promised never to rush into a pie again!

Growing up and living in Hemet, California was a lot of fun for Purity and Mr. Ed. There are so many wonderful people, animals, fruit trees, and more, that it is a truly beautiful paradise in so many ways.

HOW THE BIG ADVENTURE CAME ABOUT

Their adventure all began when Purity and BillyBee (named after the legend, BillyBee who, with his Buddies, saved a child) met as baby bees. Purity immediately let BillyBee know that she loved to venture far from the bee box and visit with every single kind of flower and tree that needed their help with pollination.

One day, Purity and BillyBee went out together, and they discovered a wonderful huge bougainvillea plant that was on a fence near a home in San Jacinto, California. Purity and BillyBee loved to fly out over to that plant and spend the day.

BillyBee was buzzing around the window and noticed a television show called "Mr. Ed," and BillyBee said it was hilarious to see the talking horse. So Purity and BillyBee made sure they came by regularly to watch the reruns of that show on television. A very nice housewife lived in the house, and the housewife didn't mind the bees buzzing around the windows. The housewife always had the windows open because she loved fresh air.

Purity thought the show was funny too. However, BillyBee was fascinated by the show, so Purity started calling BillyBee Mr. Ed because of his strong desire to see the show. And over just a few weeks of being called Mr. Ed, everyone at the hives stopped calling him BillyBee, and he became known to all as Mr. Ed. This delighted Mr. Ed to no end!

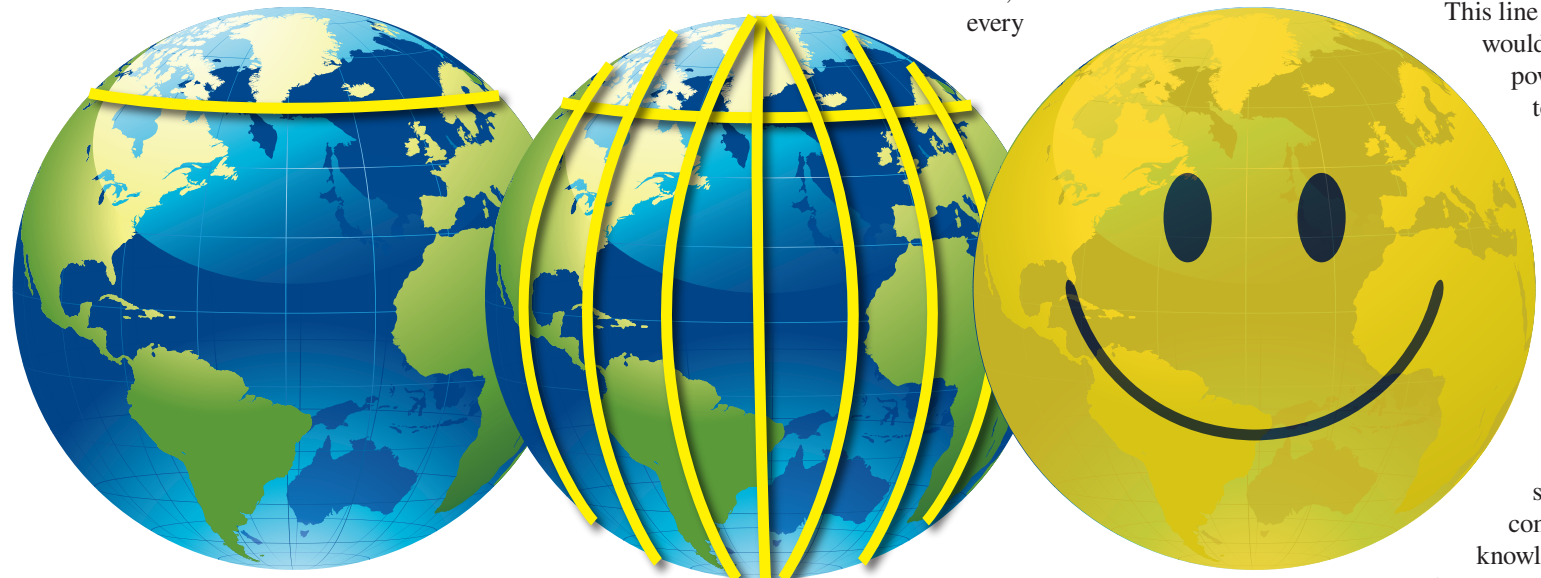

WHY MANKIND NEEDS HELP

One day, Purity was with Mr. Ed at the bougainvillea, and the news came on which Purity had never seen before because she was not actually much of a TV watcher like Mr. Ed. Purity liked talking to the plants and collecting pollen and delivering honey more than watching TV. But Purity listened to the news, and she realized that mankind was in serious trouble.

From watching the news, Purity decided she wanted to do something to help mankind, and she came up with a plan. She talked to Mr. Ed about her plan, and he thought it was a very bold one but he promised to help.

Purity decided that she had to think through all of the logistics of her plan because her plan was going to involve the detailed coordination of a complex operation involving millions of the creatures of Earth including the insects, birds, animals, fish, plants, and more. Even the air, clouds, and water would be involved.

Purity fully understood that mankind had to rely solely upon speech to communicate and had lost the ability to communicate by the universal language of thought, or telepathy as some people call it. But it was even more complicated than that. The humans had hundreds of different languages, so only some people could communicate with some people. The art and skill of a universal language communicated through thought

alone was now gone for the humans. The humans had the ability but they didn't think they had the ability so they didn't use or try to use the ability. In fact, the humans no longer conceived it was possible to communicate by thought so it never entered their minds to try.

Purity realized that the creation of loving and kind communications between all humans is now a lost art form that has led to the increase in friction between humans and their individual groups. Negative energy was now more prevalent among humans than positive energy, and telling humans to be positive and stop negative energy was and is a message that is ignored by billions. Many humans were seduced into being negative-energy beings who no longer made any effort to create only kind and loving thoughts and to be positive. Humans were dwelling on negative energy only without realizing or understanding that focusing on negative energy is what creates negative energy.

So how can you save all humans when you can't communicate with them via the universal language of thought and where the message of "bee positive" (for humans, this was shortened to "be positive") is ignored?

THE PLAN, HOW IT WORKS

Purity decided she had to come up with a plan that would transform all the humans from negative energy beings into positive energy beings. Her plan would have to rehabilitate the ability of humans to communicate effectively by thought, and to restore their loving heart in a way that would give humans the knowledge about the importance of emanating only positive energy and simultaneously regain their ability to stay positive, loving, and pro-survival in all of their actions going forward.

Purity decided her plan would create a positive and loving energy force field that would surround the globe and transmit this knowledge, similar to a radio broadcast, to every

human in the world in an effective way so that each person was transformed into a positive energy being that radiates only love and kindness to the world and takes only positive actions that help make the world a better place for all humankind.

Purity realized that she would need to enlist the support of all the non-human life forms on the planet to assist her with this task.

How could this work? How could Purity, a delightful young honey bee, gain the cooperation of all of these life forms? And once she obtained it, would her plan work? And then time...how much time would this take? Could she fit this into her lifetime and get it done and save mankind before going to Heaven? And if she did go to Heaven before the job was done, to whom would she hand off the project?

Plus, what was the plan exactly? Here is Purity's flawless logic. Purity knew that thought carries across a distance to others and that positive energy leads towards life, and negative energy goes in the wrong direction.

Purity's thought was to muster all the power of the non-human life forms of the planet by creating a positive energy force field that would surround the planet and emanate positive energy and knowledge to the humans. The force field would be activated first by a circle of life energy beam that would encircle the planet at the 45th parallel. Purity and Mr. Ed would gain the cooperation of the non-human life forms to form a connected line of living creatures that would be touching each other as if "holding hands" or touching wings, or nose to nose, but in some way touching the life form next to them on both sides forming a circle that had no breaks of any kind that would surround the globe in one powerfully connected line.

This line formation would provide the power and energy to ignite the loving energy force field that would surround the globe and convert all negative energy into positive energy while simultaneously communicating knowledge to the humans to use only positive energy and love with their every thought and action and that this knowledge is being provided to them as a gift from all the loving energy non-human life forms of the planet.

Once the line is formed, the non-human life forms would use total intention and positive thought to ignite the energy beam around the 45th parallel.

A date and time was set for the event on the longest day of the year three years in the future.

The energy beams will be so powerful, they will break through the negative mental energy and vanish it, replacing it with positive energy and the knowledge of how this has occurred, and that it is a message of love to all humans from the non-human life forms that their universe was in jeopardy so the non-humans have restored the native positive abilities of

the humans. From here forward, everyone will live in peace and harmony and everyone understands what has happened.

Special agreements between the species that eat other species would have to be negotiated for the plan to work, and a moratorium on eating each other would be put in place for this adventure. 186,132 agreements were put in place. The agreements clearly stated

IN-CHARGE SUPERVISORS

Purity decided that she would create an “In-Charge” supervisor for every quarter mile around the globe.

Purity thought about the details of her plan and every aspect of it.

She decided that there needed to be a designated “In-Charge” for each quarter-

could easily keep track in her mind by seeing the consecutive numbers and also knowing what numbers were missing.

In one sector of United States, there were 2½ miles with no confirmations. Even with Purity’s very strong ability to communicate to all the lines on the planet, Purity could not get a ping back from this section. So Purity called upon her warbler friend to fly

ANTS

Purity felt that the best supervisors to train the In-Charges would be the ants because they are very good at making continuous lines, and they had perfected the instantaneous communication to everyone in a second.

Ants are ideal for this adventure in many ways.

there would be no eating of each other and everyone would get by with some vegetarian food. Lectures in vegetarianism and food alternatives for carnivores were provided, and with reluctance, each of the carnivore species that participated in the lines agreed for a period of three years to follow alternative food plans.

This circle of thought will be so powerful that it will illuminate into a giant golden circle of energy flowing out love beams in all directions that fully encircle the globe with this powerful healing energy that converts all negative energy to positive energy.

The circle of life energy will cover the entire planet. From outer space, it will look like the Earth has turned into another sun. The encapsulation of the planet and energy conversion process will take only one day to complete, and its power is first initiated by the fully-connected bond of non-human life forms holding hands and intending this powerful energy to encircle the globe.

Would the energy beam be created once all the creatures have formed an unbroken circle of holding hands around the globe? Purity had the knowledge that this would happen based upon their intention to make it happen, so each non-human life form recruited to form the initial circle would be trained in the concept of what was being done, taught in the ability to think with total intention.

Purity would create a connected circle with all the non-human life forms. The communications would be instantaneous.

mile who would take full responsibility for recruiting the members that would make the unbroken line for their quarter-mile, and interface with In-Charge connecting points for each side of their section of the line.

Purity decided that the circle of life should be created approximately along the 45th parallel, a journey of about 12,000 miles. So she would recruit 48,000 In-Charges (managers of their area) to make the circle. Each In-Charge would be instructed to have multiple backup In-Charges in the event something should happen to the In-Charge that would keep them from participating.

Because of the universal language of all life forms being telepathic thought, it would be possible to compel a thought around the world to each of the life forms making up the circle and have that thought be communicated to everyone along the line and return to her in 4.3 hours. So if she had to communicate to everyone, she could get the communication fully around the world in 4.3 hours. This is because telepathic communication is virtually instantaneous.

Purity instructed all of the In-Charges to telepathically check in on a unique wave length of communication so that Purity could easily identify updates from the In-Charges over every other type of communication.

Purity would ask each of the In-Charges to check in daily to confirm the perfect connection of the line in their sector. Each In-Charge is given a number. They’re 48,000 numbers. As connections are formed, Purity

her out there so they could investigate and repair the connections, debugging whatever was wrong. When Purity arrived, it was a vineyard. Grapes had fallen to the ground and fermented, and many of the ants had become tipsy and intoxicated from the fermented grapes, just like a human would be intoxicated from an alcoholic beverage. Everyone was having a marvelous time, but there was no focus to keep the line in place so a reroute had to be done to sidestep this vineyard, and a policy was put in place around the globe pertaining to vineyards: The Way Through Is the Way Around.

Purity and the warbler first had to lift up and remove each ant to a place outside the vineyard so the ants could sober up. Once sober, each ant was instructed in the new vineyard avoidance program and shown the new route, and each ant was happy to comply.

Getting the line physically created around the globe and then getting the energy beam created via mental thought and intention were the keys to the success of this project. Both the physical and mental aspects of the plan were equally important.

Each non-human life form on the planet was taught how to take a thought and make it happen by visualizing the positive outcome and intending it to happen with total intention. The total intention skill was taught to have no counter-thoughts, just pure positive thought with the total intention to make it happen.

The ants are world-renowned among all insects and animals to have the most experience and skill in forming long lines. The ants can communicate instantaneously to every member of a line no matter how long the line, and every ant knows when they are to join the line, and their lines can stretch for miles.

Purity knew she would have to give each In-Charge the detailed instructions of how to create a powerful link that would transform into a healing energy beam that would encircle the globe. She asked the ants to train the In-Charges of all species, and the ants happily agreed.

EXPERIENCES WITH SPECIES

Purity had many wonderful experiences coordinating sections of lines with different species.

WILD HORSES OF AMERICA

The wild horses of the northern United States were particularly frisky but cooperative and enthusiastic to participate and help. They agreed to assemble all the wild horses from multiple states into a continuous section in Montana that would span a distance of 87 miles.

To form their lines, the horses had to make sure that they formed the line by being side-by-side because they were always wanting to kick up their back heels. So to avoid causing any injury to each other, they agreed to be side-by-side and touching each other with each horse’s shoulders touching the hind section of the next horse. This allowed each horse to be as frisky as they wanted during this exciting adventure, kicking up their

heels as often as they wanted and without hitting the horse next to them. Little horse foals joined in the line formations next to their mommies.

A series of special agreements had to be made with each of the stallions who like to compete with each other. The stallions enjoyed sparring with each other and standing on their hind legs and kicking with their front legs. They also liked standing on the front legs and kicking with their back legs. These types of skirmishes would go on all the time.

The wild horses of America agreed to work together and galloped out in all directions to gather all the horses to form a line that would cover 87 miles.

PORCUPINES

Porcupines were contacted and several practice runs were made to see how this could work. It turns out that the majority of porcupines, when making a physical connection, were not able to control the release of their quills. But there were 323 that had no problems at all and asked if they could be part of this grand plan to save mankind and they were, of course, accepted.

DEER AND ANTELOPE

On the other end of the porcupines is the connection to the North America deer and antelope that are so plentiful that their connection crossed several states. It took a few months to get the word out to all of them to assemble a line across three states but they did it, and they all came together with excitement and optimism.

BEARS

Grizzly bears and black bears agreed to participate as well. They decided to participate separately in their own groups to avoid any potential urges to compete between the species about who is bigger, who's faster, who's a better tree climber, who catches more fish, etc. The vegetarian idea was of no concern for the

bears because they all agreed they love berries so much, they would happily be vegetarians for three years because there were plenty of berries to be had.

BIRDS

Every species of bird encountered, around 10,000 species, including swans, geese, owls, bald eagles, hawks, blackbirds, ravens, crows, robins, bluebirds, sparrows, and more, all conferred and agreed to make the

connection as ground birds—standing on the ground with the wings outstretched wingtip to wingtip would be possible and they all agreed to participate. Each bird would make the connection by spreading their wings and standing sideways to create as much length in the line as possible.

CARDINALS

In the Midwest of the United States, one of the Ohio State cardinal birds decided to coordinate cardinals from five states and they decided to follow the example of all the other species, standing on the ground, wingtip to wingtip. However, the cardinals also decided to alternate between male and female pairing up as husbands and wives to make a pretty line of red, green, red, green, etc. They covered a distance of 2.3 miles.

HUMMINGBIRDS

When the word got out to the hummingbirds, the majority of all hummingbirds agreed they all wanted to help mankind. Dear hummingbird friends of the Mayors of Idyllwild, California, Huey, Dewey, Louie, Newy, were all so excited, they could hardly sleep. They took up the lead positions in coordinating all of the hummingbirds. 425,000 hummingbirds joined the cause with an estimated 6 inches per hummingbird when stretched wing-to-wing resulting in 40 miles of hummingbirds.

DOVES

The doves were so moved by Purity's plan to save mankind, they cried tears of happiness for ten days. Their tears of joy and happiness came from their realization that their purpose to help mankind would finally be achieved through the accomplishment of this bold plan. The doves went back to cooing. The cooing of the doves was such a wonderful and calming sound. Everyone in the line enjoyed listening to the doves.

MOTLEY CREW

During the coordination of the line sections, Purity and Mr. Ed ran into a group who called themselves "The Motley Crew," an assemblage of creatures that have come to live as a family group and included two cows, two sheep, three mountain goats, two roosters, and a feral cat. They were all thrilled to participate in the adventure. The Motley Crew were very proud of their formation of 22 important feet of the global line.

GROUND SQUIRRELS, BUNNIES, JACK RABBITS, PRAIRIE DOGS

All the ground animals such as bunnies, jack rabbits, prairie dogs, ground squirrels, got together and thought it would be fun to make their section of the line underground. They decided that they could make a double-wide underground tunnel for at least 10 miles, and along their line, there could be pop-out holes in case of emergency.

Another unique aspect of their underground tunnel was that they built side sections to allow room for mommies to have their babies whenever that would occur on the date of the event or any time earlier during the three years of practice sessions. This all worked out perfectly, and mommies were not required to hold line formation during these times but they enjoyed participating in this historic adventure.

RACCOONS

The raccoons were particularly fun to deal with. Their natural inclination to steal food caused some complications in the beginning, but they worked it out. Eventually, the raccoons agreed to steal food only from themselves and keep the food stealing within their own species, the raccoons. This was all very amicable and completely understood by each raccoon. The baby raccoons also participated with complete joy and happiness.

PLANTS

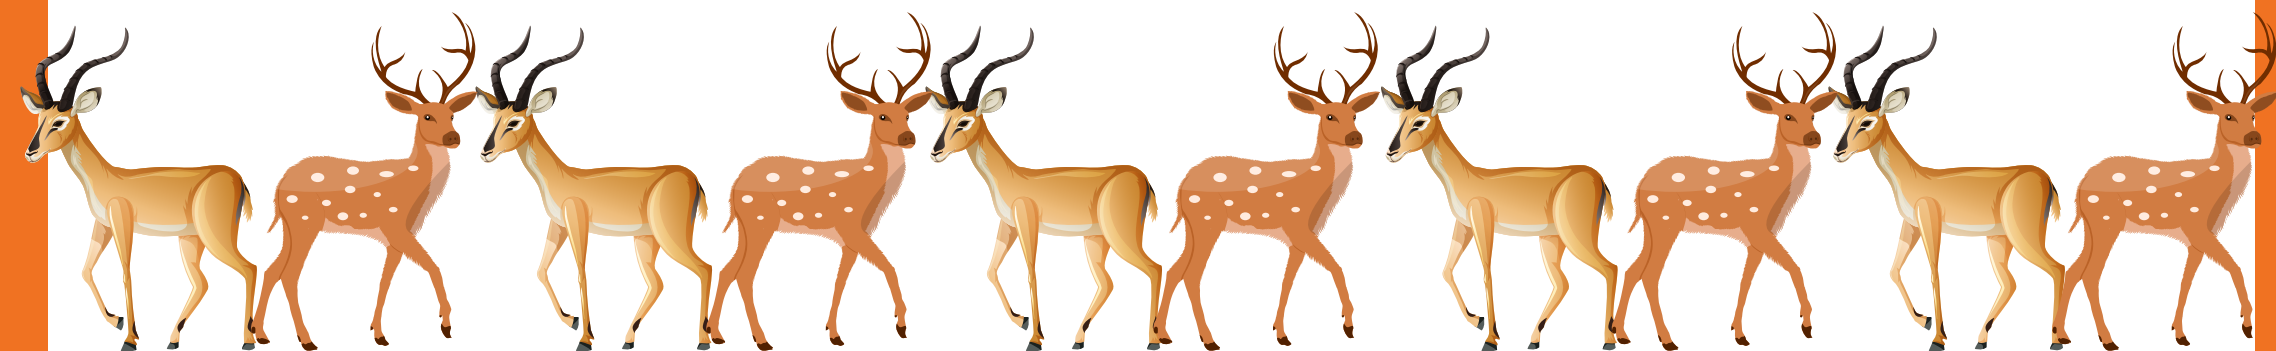

The plants of the world were happy to hear about this program too, and they all wanted to participate. Since they could not move about, they did agree to all work hard to produce even more grass, plants, berries, apples, and crops to help supply the animal kingdom with more vegetarian food during the three-year hiatus from eating meat. Each of the species started to have fun experimenting with the vegetarian food, seeds, nuts, grasses, and fruits that the plant kingdom was so happy to provide to help save everyone.

AIR WATER CLOUDS

The clouds agreed to provide cool shade on a hot summer's day and rain so that everyone in the line always had enough drinking water. The clouds agreed to create a three-year no-flood-zone across the 45th parallel and up to the 60th parallel near the ocean going sections of the line. The air promised to be calm during all practice sessions and on the day of the big event. The rain water agreed to be its more pure, most delicious, most cool and satisfying for everyone involved in the project.

CRUISE SHIP

On one trip back across the Atlantic Ocean to North America, Purity and Mr. Ed decided to take a cruise ship across the ocean on an 11-day trip. Purity and Mr. Ed decided to select a luxury cruise line that had many gardens,

plant sections, and flowers so they could get some pollen to eat during the trip and then hide out in a little cubby section they found so they would be safe and secure while resting in the day. They decided, once everyone had gone to sleep, that's when they would fly out and get some pollen and honey from the flowers and then fly back to the little hiding place in the day.

Purity made a little bed out of some flower petals that she brought back to their corner so they could enjoy the nice smell of flowers while they were resting. On their first day at sea, Mr. Ed thought Purity might be getting a little seasick with all the rocking back and forth. But in just 24 hours, Purity had gotten her sea legs and was completely used to all the rocking with no problem. Mr. Ed was undaunted and never had a problem. Purity enjoyed having 11 days of rest and felt rejuvenated and ready to return to her busy schedule of enlisting the support of all of the non-human life forms on the planet to help save mankind.

THE RENEGADES

Much to Purity's and Mr. Ed's surprise, they found a group of bees that were also traveling on the ocean liner with them to the United States. They call themselves The Renegades because every year, they like to take a vacation from the busy work of the beehives and go off on an adventure. They said they really liked luxury ocean liners because these boats had such a variety of exotic flowers.

One time, The Renegades had been out collecting pollen, and a big storm came up so they took shelter under some beautiful flowers that protected them from the rain, and they decided to wait out the storm. They all fell asleep and were very cozy all huddled together under some nice leaves that provided a perfect umbrella and shelter from the storm. What they hadn't noticed was that the flowers were in a huge flower pot, and while The Renegades were sound asleep, the flower pot was picked up and put in a special truck made for the transportation of live plants. When The Renegades awakened, they realized they could not get out of the truck, and they just had to wait out the trip. It turned out the trip was across the country, 2,942 miles to Boston, in

the middle of winter.

Now, The Renegades were in Boston in December with temperatures below freezing. The Renegades knew they would have to find other honey beehives where honey was stored for the winter and ask for help.

Being honeybees and very intelligent, they knew where to look. Fortunately for The Renegades and before freezing to death, within five minutes, The Renegades located the first hive. Everyone in the hive was very welcoming and thrilled to have them join their hive for the rest of the winter.

The Renegades knew they would have to spend the rest of the winter with the Boston bees because it was so cold out. It would be too risky to venture out again until spring. The Renegades loved making new friends in Boston, and they noticed that Boston bees have a slightly different accent than the California bees. When The Renegades got back to California in the spring, all the bees at the bee boxes commented on The Renegades' newly acquired accents.

THE BLACKPOLL WARBLER

In the initial setup of the great plan to save mankind, crossing the large expanse of water in the Pacific and Atlantic oceans came down to three people, a blackpoll warbler, Purity, and Mr. Ed.

Purity's biggest concern was how to keep the continual connection over large expanses of water. Purity, a Hemet, California-born honey bee, had heard from other bees and bird friends about these amazing blackpoll warblers who cross the ocean in several days traveling from North America to South America. Being that Purity was not far from the Pacific ocean, Purity decided to see if she could rendezvous midair with the blackpoll warblers as they were heading south for the winter. She spoke with her friends to get the best information about the altitude and timing of when she should make the attempted mid-air rendezvous with the warblers.

It was decided she would hover at 3000 feet. After a few weeks, Purity began to see the blackpoll warblers, and she flew up to

their level and began to make contact. She explained what she needed and most of the warblers said that they just couldn't change their schedule. But after 71 conversations, there was finally a warbler named Skip, and Skip loved the idea and said that he would help Purity on her mission to help save mankind. Skip accompanied Purity back to Hemet so she could rest up from hovering.

Purity explained to Skip that she needed a way to cross the Pacific and Atlantic oceans around the 45th parallel so that she could then begin coordinating on land in the other continents the line of connection around the globe. Skip said that Purity and Mr. Ed could nestle in under his feathers on his back shoulders so they could keep warm while he gave them a ride from continent to continent. Skip suggested they form the line on land heading north to the 60th parallel just for the ocean-going parts across the Atlantic and Pacific. The mileage over water would be much less distance and safer. Purity and Mr. Ed agreed and felt this was a good idea.

Every time that Purity and Mr. Ed had to cross the ocean, Skip would take them, and it all worked out well. There was only one time when a sudden wind shear at high altitude caused Skip to flip upside-down, and Purity almost fell off. But Mr. Ed held on tight and kept Purity from falling, and Skip was quickly able to right himself so he was no longer upside-down. It was a very tense moment for all of them.

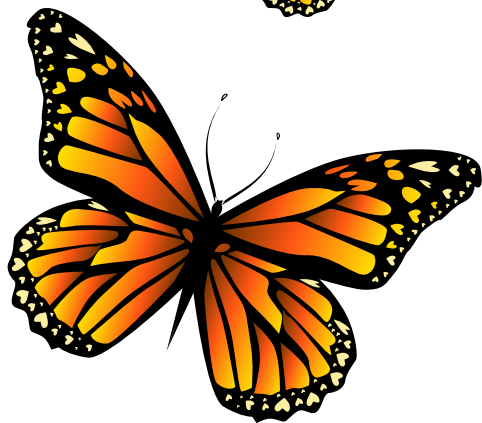

CREATING THE OCEAN CONNECTION

Purity had two ideas for the creating the unbroken connection either over the ocean or in the ocean.

One of Purity's ideas was to gather all the species of birds on the planet and have them fly in a connected line, somehow staying in touch with each other while flying. One idea was they could use their beak to hold the tail feathers of the bird in front of them while flying. Another idea was to connect all the dolphins, whales, sea turtles, sea lions, penguins, and other sea-life species in a similar way while swimming.

Purity asked Skip if he could contact the

other 10,000 bird species to see if they would be willing to fly together over the oceans and make a connection while flying and maintaining in mid-air the connected line. Purity flew out to a buoy just outside of Dana Point Harbor in California to explain her plan to the sea lions. It took a few days before an enthusiastic sea lion perched himself upon the buoy. His name was Hoggie because his friends said he was the most effective at hogging up the space on the buoy and getting the other sea lions to fall off so Hoggie could have the room. Hoggie loved the idea of helping mankind, and he was sure he could inspire other ocean life to join in the task.

Skip and Hoggie worked for more than a year to create their over-the-ocean or in-the-ocean unbroken connection from shore to shore. Thousands of practice attempts were made.

At approximately the same time, both Skip and Hoggie reported their findings to Purity and Mr. Ed. Skip and Hoggie were very sad to come back and report to Purity that both the in-ocean strategy and the by-air strategy for making a connected line would not work.

Purity became even more determined to find a way to create the ocean link. Purity and Ed flew out immediately into the air and started calling for help in every direction. "HELP, HELP, HELP!"

Then they heard a voice! Purity and Ed looked at the monarch. The monarch was so beautiful, and Mr. Ed asked, "How can you help?"

The butterfly introduced himself. The monarch said his name is EIP (pronounced EEP but stands for "Everything Is Possible"). EIP explained that EIP felt he could gain the cooperation of the other monarch butterflies to fly across the ocean in close proximity so their wings were always touching, and they could make the connection across the ocean and from shore to shore at every expanse of water along the 60th parallel.

Purity and Ed weren't sure how this would all work but they were thrilled to finally have a partner. EIP gathered a group of thousands of monarchs. The monarch butterflies were undaunted and unstoppable. Mr. Ed had never seen such determination and conviction of purpose in any species.

Purity talked at length with each of the monarchs about their thoughts on how this line could be formed over the ocean and how it could be maintained and held in intense winds and storms they may encounter. She felt that many monarch lives would be lost in the attempt, and yet, they were so upbeat

about the project, they had no fear or concern should they perish.

Purity's concern for the potential massive loss of life of the monarchs being too great a gift to give in such high volume aroused the attention and curiosity of the Forest Fairies. Forest Fairies are known only to the non-human creatures of Earth and have God-like spiritual powers. They can jump in to provide assistance whenever a being shows themselves to be worthy and exemplary, and they have the ability to extend the longevity of life.

What aroused the interest and curiosity of the Forest Fairies is that millions of Earth's creatures had come together and were demonstrating this exemplary behavior. In all of existence, this had never happened before. Exemplary behavior had, in the past, been demonstrated by a few individuals here and there.

This never-before-seen initiative of the non-human life forms of Earth to save mankind was unprecedented. The willingness of millions of monarchs to sacrifice their lives to save mankind was impressive, and Purity's plan was equally impressive along with her high regard to save the lives of the monarchs.

The Forest Fairies decided to help. They made a unanimous decision to help the monarch butterflies create an unbroken line across the oceans without loss of life to the monarchs. Their plan was to create an impenetrable unbreakable wind-protection tunnel across the ocean from shore to shore where the monarchs could enter and form their unbroken line.

The Forest Fairies calculated if there were enough monarchs to make this unbroken line over the great expanses of ocean, and there were not. The Forest Fairies asked each of the monarchs to go out and contact the other 17,500 species of butterflies on the planet and gain the cooperation of these butterfly species to help with the project. The monarchs were thrilled to hear this suggestion, and merrily, off they went to get their butterfly friends to help save mankind. Over the next six months, the monarchs completed their task and were able to recruit all 17,500 species to join in. The Forest Fairies worked with the butterflies to coordinate food and water stations in the wind-protection tunnel and proper ventilation and temperature control. They agreed to form a line and extend their wings while standing on the bottom of the wind-protection tunnel. Each wing extension would touch the wing of the next butterfly on each side. A perfect line would be formed this way.

The Forest Fairies also agreed that all butterflies would receive a life extension of three years so that this project would be completed from start to finish.

FINAL PREPARATIONS FOR THE EVENT

In the six months before the big day of the event, practice sessions were increased to provide the connected line around the globe. Each In-Charge would report to Purity the status and connection of their section, and Purity could see that the line was forming with greater speed and accuracy each time. She felt certain they would all be ready on the upcoming longest day of the year, June 21.

During the entire three years of preparation, everyone was instructed to visualize a successful outcome of the project and to conceive of the success of the program with no counter thoughts, only success thoughts.

Everyone was asked to have a substantial meal before their start time and to also drink lots of water to stay hydrated through the event. Everyone was ready. Everyone was so excited, they could hardly sleep.

THE DAY OF THE EVENT

The event started right on time. Purity and Mr. Ed were in the line and managing the speed of the global connection. Everyone was so determined to be on time and effective, it took only seven minutes for 100% of the line to form and for Purity and Mr. Ed to be able to confirm the connection. At that point, Purity gave the signal for the positive energy love beams to ignite the entire line. Everyone in the line applied their total intention to expand the energy of the line to encompass the globe, first to every non-human life form on the planet. This connection took another 55 minutes to create. At that moment when everyone was connected, Purity gave the signal to now focus the energy beams to every human on the planet.

Immediately, everyone in the global line and all the other non-human life forms felt the loving impact of the energy beams and were positively affected themselves. A state of extreme exhilaration penetrated every single entity on the planet. As negative energy began to dissipate, the power of the energy beam increased its love and affinity. From outer space, it looked like the Earth had turned into an ethereal golden ball.

Humans began to perceive the message from the non-human life forms and transformed from negative-energy to positive-energy beings.

ENERGY BEAM MESSAGE TO HUMANS

This is a message from the non-human life forms on the planet, all plants, animals, insects, life forms in the oceans, lakes, rivers, and every single living thing including the air, clouds and water: We are your friends. We are sending you a loving message from us. This message is filled with healing energy that converts all negative energy into positive energy. All human beings are now positive-energy beings who only use love as the basis for every action they take and every thought they think. This energy beam ends forever any struggles, wars, or any unkind actions. You are now friends with your enemies and the word enemy is now extinct. You can go anywhere in the world and embrace all living creatures and humans as friends. This energy beam now enables you to communicate with every living creature and human through thought and language. This energy beam will last for 24 hours at which time, all negative energy on the planet is vanished forever. We are imparting to you the knowledge, wisdom, and process for living as a positive energy being and the importance of communicating and acting in positivity with every thought and action you take. We are transferring to you everything we know. You now know what we know, and this knowledge will stay with you forever. We thank you for carrying on this legacy to all future generations. We love you with all our heart, and we look forward to being in communication with you from here forward.

THE RESULTS

The world began to immediately transition from negative energy to positive energy. All fighting stopped. Everyone immediately knew the person they were fighting was a friend. As they looked at each other, they had the feeling their previous opponent was a brother that had come back to life, and they were so exhilarated to see them again. Their hearts exploded with joy and tears of happiness. They embraced each other with a love so great, it truly was the feeling of a loved one returning from the dead. They hugged each other and introduced themselves. They were interested in each other.

Both sides of any argument now had full understanding, love, and respect for each other. Everyone pledged to help each other.

The world became more lovely with every passing hour and day. The expansion of the loveliness of the world never diminished but kept expanding as everyone started to think

more about how they could contribute more to the well being of others and the planet. People began to communicate with each other and spent more time socializing. There was a new balance to life that kept elevating and improving with every day as people started to spend their time thinking about things they could do to improve the conditions of life for everyone else.

Crime ended. No one needed to lock their doors anymore.

Picnic tables appeared at every house, and people would stop by and bring a lunch so they could join others whenever they wanted to do so, whether they knew the people or not. Everyone was welcome everywhere. On good weather days, people spent more time having conversations with friends, family, and passersby. People put up comfortable hammocks for lounging or sleeping over. Sleepovers were now just a part of the society.

There was no more need for animal shelters. Every pet was adopted and taken care of. All prisons, homeless shelters, police stations, psychiatric facilities, etc., were transformed to community service organizations and apartments. Everyone now had high-quality facilities in which to live. Slaughterhouse and factory farms were disbanded. All of

the animals become pets of loving families around the world and lived happily ever after. People started growing their own gardens, and fruit-bearing trees were planted by everyone. People shared and exchanged the produce from their gardens and trees with their neighbors.

People shared recipes and details about their cultures. Student exchanges increased by 800 million percent. Pollution ended. People and businesses took responsibility for their environment. The air and water quality of the planet cleared.

The cloud formations were exhilarating to see every day. The oceans filled up again with new sea life. Wildlife flourished. Bird

populations increased and everyone could hear the singing of birds all day and night. The words enemy and war vanished from the vocabulary and only ancient dictionaries carried the terms. The conditions of buildings continued to improve as everyone was interested in making repairs. On a daily basis, everyone could see the conditions and quality of life improving, and the more it improved, the more was done to create the continual improvement.

People visited hospitals, nursing homes, and rehab clinics to bring joy to those in the facilities. People visited people they didn't know just to bring joy. The visits and love were so great, many people no longer needed to be in a facility. Many people became well by just being loved.

Everyone was so kind, it was as if you were touched by an angel with every communication.

FROM THE AUTHOR

What is greatness is simply the decision to be great.

Every principle of existence in this story is true.

Positive energy leads towards life. Your thoughts do communicate to others. You can exponentially increase the power of your positive thoughts by simply putting the thoughts out there.

The purity of Purity's soul is within you. You can use that power to help create peace on Earth. Never doubt your power to be a force for good.

Helping mankind is a powerful urge of existence, and you can tap into the power by being positive and thinking about all the things that you can do to improve world conditions.

If we all work together, we can create peace on Earth by simply being loving and kind with every thought and action that we take.

You have something to do with the quality of life on the planet.

Don't complain. Take action, take positive action to help others. Helping others creates a state of exhilaration and happiness.

Love animates the world.

You are cause over life. You want to be a positive cause.

Here is how you create a positive effect:

CAUSE OVER LIFE

That which you can conceive and believe
And hold in your thoughts with certainty

Will come to be, you will see
And so it has been for eternity

The key is to fully believe
And not vacillate with uncertainty

But total intention is the key
And so it has been for eternity

Support Animal Rescue!

Rescuing animals is a constant occurrence. In the Idyllwild area, there are many dedicated people that help with rescue, and our local animal rescue organization, Idyllwild Animal Rescue Friends (ARF), does a fabulous job. There are other rescues in the surrounding areas that are also excellent.

My husband, Glenn Warren, and myself, Phyllis Mueller, are also a rescue team in

the area. We participate and help with as many rescues as we can, and we also do our own rescues, meaning Glenn and I will stop and work on the rescue of any animal we find is in harm's way, and this can be a domesticated pet of any kind or any type of wildlife and in any area where we live or travel.

Here are just a few recent rescue stories from so many that happen every year.

RESCUE STORY #1 RESCUING JOLENE

On September 16, 2023, many of the wonderful Idyllwild community members, our dear friends, my husband, Glenn Warren, and myself, Phyllis Mueller, became involved in the rescue of Jolene, a darling dog that went missing on the day of the wedding of Emma and Devin Schneider, the

owners of Jolene.

The bride and groom and the wedding party were also tirelessly working as one of the rescue teams. Everyone was determined to find Jolene.

It was particularly heartbreaking to think how hard it would be to have a wonderful time at your wedding when your dog went

(L to R) Devin and Emma Schneider with (L to R) Xina and Jolene

missing earlier in the day and was still missing.

Jolene was spotted over by The Nature Center. It was at that time that my husband and I arrived to help with the rescue. Within the first hour, Glenn and I actually found Jolene on Silver Fir just 20 feet from

our car. She was just standing there, looking at us, not moving. My heart jumped for joy that we could bring this dog back to Emma and Devin before their wedding, but it was not to be.

We carefully tried to approach Jolene and entice her to come to us so that we could return her to her owners. We had lots of delicious dog treats with us, but as soon as we got close, Jolene ran with tremendous speed right up the mountain and disappeared. She was too fast for us, and it was now getting dark outside.

We all continued to search well into the evening. As so many of us do when involved in a rescue, we risk our lives to save the animal, climbing in rugged terrain in the dark with little ability to see but a great chance of falling, getting injured ourselves, or running into a mountain lion. All rescuers that I know just push through the dangers and keep looking. And so it was this evening for all of us.

Finally, we concluded our search for the evening and resolved to begin again in the morning.

The following day, Jolene was rescued by Mike Alahuzos, who found Jolene when Mike was out walking his dog, Porsche. Jolene was exhausted and unable to move, sitting among some manzanita trees in Pine Cove. Jolene has hip issues, and with all the running for so many hours, she finally could not go on.

Thank Heavens for this happy ending. Everyone was so thrilled to be involved in this and learn of the rescue.

One of the things that makes these rescues possible is that so many

people get involved to help. The word goes out via social media the minute we learn of the lost animal. Many people rally and come immediately to the location where the animal was most recently seen, and the search begins.

One person commented that we should look at Dolly Parton's house, and many of us know where that address is. Stacy and Rick Emmons immediately went and searched there.

The funny thing is, even though I knew the song "Jolene" was written by Dolly Parton and is a favorite song of mine, I did not put two and two together that the person on social media was joking. I just thought there had been another sighting of Jolene at Dolly Parton's house. LOL But it's good to leave no stone unturned in a rescue, and we certainly were searching everywhere.

It turns out that Jolene is named after Jolene in the song written by Dolly Parton. OK!

My favorite rendition of that song was on "American Idol" when Brooke White did a lovely performance. Brooke, the violinist, and the singer that did the backup vocals all did a fabulous job, and I think it's the best version of that song that I have ever heard. If you have never heard this version, watch the video of this performance on YouTube.

Devin and Emma Schneider on their wedding day

RESCUE STORY #2

RESCUING BRITNEY JEAN

From Josie Perrone about their actions to rescue Britney Jean:

We are Josie, Dave, and Nicolas Perrone from LA. We knew we had to catch Britney on our camping trip when we saw her along 243 during a cold, foggy rainstorm. Others had stopped and cars were swerving to miss her. Clinics were closed, the fire dept was unable to help, and animal control was busy 2 hours away. Luckily I remembered we had met Mayor Max at Wooley's earlier, so I checked his website and reached his Chief of Staff, Phyllis. We ultimately brought Britney Jean to Phyllis, who graciously said she would take the next steps. It was a happy ending when the owner saw a social media post and was reunited!

Britney Jean

From Phyllis Mueller:

Once Britney Jean was brought to our home, we posted all over social media that we had Britney Jean in our possession and were taking great care of her and that she was in good shape, no injuries. Britney Jean's collar tags were not current. I kept

calling the number on the tag asking the man who answered the phone if he was sure he wasn't the owner. LOL He convinced me he was not the owner and that it was a new number for him. So I asked ARF if they could see if Britney Jean was chipped. They said "Yes" and immediately stepped in to see if Britney Jean was chipped. She was not. It was after-hours when this occurred, so Janice and Robert Murasko did the chip test at their home. Thank you!

We then used social media to locate the owner. I could see that Britney Jean was well-cared for, and I believed this was NOT a case of abandonment. I felt the owner would be seriously looking for such a well-cared for dog, and we were right.

*Josie, Dave, and Nicolas Perrone
They caught and saved Britney Jean*

It only took a few hours, but luckily the owner called us and said, "I believe you have my dog." And he was right. They had been out searching for their dog. I was SO happy to get that call. This is such a happy ending for this senior dog! The owner saw our post on social media.

RESCUE STORY #3

RESCUING NEIGHBOR'S DOGS

Though we do not have a photo of the two dogs that we rescued, a dear friend of ours, Michael Gray, came to our house, and when he arrived, he told us that there were two large poodle-looking-type dogs that were running down the street. My husband and I knew immediately who the dogs belonged to because they were local. We always see them behind their gate

barking at us when we go for walks.

Why they were out running around, we did not know, but we did find out.

Glenn and Michael went out to rescue the dogs. They were able to easily catch them. This is a dream come true in a rescue!

We had the telephone number of the owner, but upon calling her, we found out from her that she was out of town in Kansas. The dogs were left at home with a dog sitter who attended them in the evening and throughout the night.

We further learned that a real estate agent had come to the house during the day because the house is on the market. That agent did not realize that the dogs escaped when the agent opened the gate. The agent left the house not knowing the dogs were no longer present.

By working with the owner, getting the gate code, and getting into communication with the dog sitter, the dogs were safely returned home.

This was our first rescue where the dogs were inadvertently on the loose because of a real estate agent who came to the house when no one was home. It is very lucky this had a happy ending.

Support the Office of Mayor Max

We would love to have your support of the Office of Mayor Max in any way that you can.

JOIN POET

First and foremost, we would love for you to join POET, covered in an earlier section of the calendar. This important initiative is the way that we can help create peace on Earth for all mankind, and we would love your help.

MERCHANDISE – Rival the Fashion Industry Icons of Milan, Italy like Ari Nikjeh, Pictured Right

We now offer a few apparel items on our website at: www.mayormax.com

You can support the Office of Mayor Max and look ultra fashionable in Mayor Max apparel. These gifts are fun for everyone and also make great presents, especially for Mayor Max fans and animal lovers.

In 2024, we plan to add additional merchandise items that we will also carry in a few selected stores in Idyllwild when we get them. We plan to update our website and include a shopping cart where you can easily select and purchase additional merchandise items. The following items will be added to our website as soon as they arrive:

T-shirts • Baseball caps • Mugs • Stickers • Key Chains • Stuffies

When everything is ready, we will make an announcement on social media.

DONATIONS

Here are all the ways you can make a donation to the Office of the Mayor of Idyllwild:

Hello Everyone! It's Mayor Max and Vice Mayor Meadow!

We are so excited about the New Year! We hope you are too!
We have big goals and plans to accomplish our goals. This is because:

**If we name it and claim it, we will gain it!
What we conceive and believe, we will achieve!**

We are so exhilarated by this! How wonderful to be cause over life with goal setting! Here are our Top Ten Goals for 2024!

1. More Visits with Visitors!
2. More Belly Rubs!
3. More Ice Cream!
4. More Trips to the Dairy Queen!
5. More Burgers!
6. More Burger Breath!
7. More Chuckit Balls!
8. More Exercising and Retrieving Balls!
9. More Bobcat Chasing (Fun but hard to catch)!
10. More Hole Digging!

The future looks bright! We know how to get our goals accomplished. Every year, Phyllis puts some of the secrets to the universe in the calendars, and the month of January always has the secrets for accomplishing your goals!

Here is a goals program that works well. You can try it out this year!

- Decide what are your goals
- Write down your goals
- Review your goals list several times a day
- Constantly visualize your goals as accomplished
- Make a plan for accomplishing each goal
- Work toward your goals with total intention to accomplish them
- Never give up on your goals

We just know you will get all your goals accomplished. We are so happy for you! Have fun with this process!

We love you with all of our heart!

Love always,

Mayor Max and Vice Mayor Meadow
Your Dear and Devoted Friends Forever

We are visualizing!

Hello Everyone! It's Mayor Max!

One of my most favorite things to do is attend weddings. We Mayors are always so thrilled to be invited to these events as special guests. It touches our heart so much, and these are certainly occasions to celebrate love!

I hope you love this picture of Marissa Gradman with me on her wedding day at Harvey House, one of the extraordinarily lovely wedding venues in Idyllwild. We had a great time at the wedding. I was pretty well-behaved most of the time, including for photos. Glenny did have to try to hold me back from eating some wood chips (gobbled up about 10 of them) and also from trying to snag some food off the tables. I just couldn't help myself.

Wedding events are particularly fun because there is so much love and kindness being demonstrated by everyone. Love and kindness are so important. We like to do as many kind and loving things for others as possible, and we make sure that we are doing kind things for others every day. It certainly is one of the most fun parts of the day to plan what kind and loving things we are going to do today! We love creating joy.

You can even save a life with just a kindness, a smile, a positive and loving communication, an acknowledgement, and showing that you care. You can elevate the spirits of people by letting your loving heart show through. Most importantly, you can use love and kindness to solve any challenge. If you are ever wondering what to do or say in any situation, start with love and kindness. It's the right place to begin and goes a long way to creating ongoing harmony and happiness.

So, what will you do today to create love and kindness? Make a plan and then do it. It's fun and so joyful!

We love you with all of our heart, and we look forward to seeing you and hearing from you. We promise to love you for infinity dot dot dot!

Love always,

Mayor Max

Hello Everyone!

It's Deputy Co-Mayor Mitzi!

We love Idyllwild, and it is not only a wonderful place to visit, but it is an extraordinary place to live. You should move here. Here's why!

- Breathtakingly beautiful mountain scenery with pristine clean fresh mountain air.
- Wonderful people that are friendly. It's like a big family, and Phyllis loves the fact that some people often go to the grocery store and the post office in their pajamas, Phyllis included!
- More than 30 fabulous restaurants! They are all good!
- The best movie theatre! And not just the movies but excellent food and refreshments!
- Wonderful lodging. Please see www.idylldogging.com for your stay in Idyllwild!
- Something to do for everyone including hiking, shopping, dining, visiting art galleries, camping, or just spending time at the beautiful Idy Park and visiting with wonderful people. Thank you, Dave and Loie!
- Very dog-friendly everywhere, including having four Mayors, all Golden Retrievers: Mayor Max, Vice Mayor Meadow, Deputy Co-Mayor Mikey, and me, Deputy Co-Mayor Mitzi! You can visit us on any day. The town also has a fabulous dog bakery and boutique – Mountain Paws!
- Many wonderful events all year and so many activities to do. Don't miss our annual Tree Lighting event. Thank you, Stephanie and Shane!
- Opportunities to enjoy wildlife. We love the redheaded woodpeckers that are all so chipper and can be seen on any day. You can also see every other type of wildlife including squirrels, deer, rabbits, bobcats, and the occasional mountain lion that Phyllis finds startling to run into every time!

And so much more.

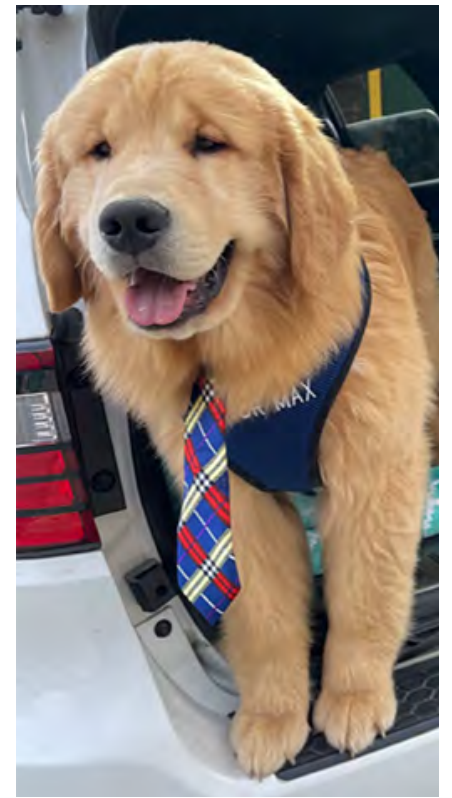

Come visit us at any time! If you have any questions, don't hesitate to call the Office of Mayor Max at 949-525-0100. We love you with all of our heart!

Love always,

Deputy Co-Mayor Mitzi

The Gift

The Gift

*An angel came to visit me
It gave me quite a lift
And as we talked, my spirits soared
Then I received her gift*

*A spirit so light and kind and free
Her heart was made of gold
And in her eyes, I saw her soul
'Twas neither young nor old*

*The gift she gave astounded me
And brought my soul to tears
Of happiness for all mankind
And then she came quite near*

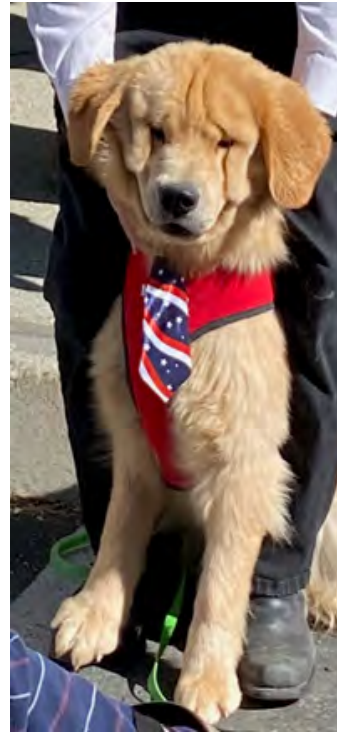

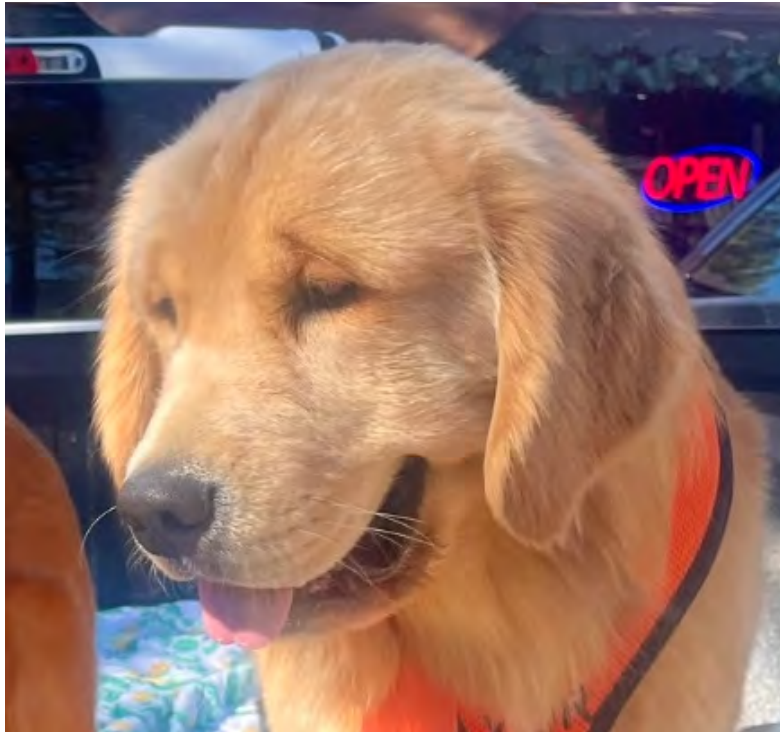

*She caused me to realize
There were something I then knew
For I was looking not at her
But I was seeing you*

Love always,

The Mayors of Idyllwild and Staff

Hello Everyone!

It's Mayor Max and Vice Mayor Meadow!

Phyllis and Glenny love to take us to this special place where (1) we get treats, (2) they like to spend a lot of money on us, and (3) people we don't know that wear funny outfits like to pet us with strong interest, check our heart rate, and put us by this funny machine that takes pictures of our insides. We can't imagine why they would want pictures of our insides. We can see that our insides are not as cute as our outsides. "It's odd, I find it odd."

These visits seem to be date-coincident with our eating the elastic bands of our ties and also attempting to eat the whole tie. This is an amazing coincidence that happens every time!

These visits are a great deal of fun because we get a long car ride there and back. Plus, on the way home, we usually get a treat.

The odd part of these visits is they like to give us something that makes us queasy and then, up comes whatever we ate. We Mayors call these the queasy treats, and these are not our favorite kind of treats. But we will eat anything, so we do eat the queasy treats.

In addition to us eating our ties, we also got to make these special trips when we ate:

- A ball
- Four car parts from our Durango
- A large yogurt container
- Blanket stuffing

So far in our first year of life, we have made eight of these special visits. I think I heard Phyllis say something about

being over budget. I know she was kidding, though, because she keeps taking us there. So, of course, she loves it!

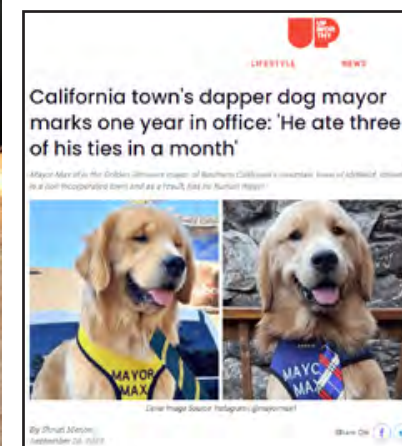

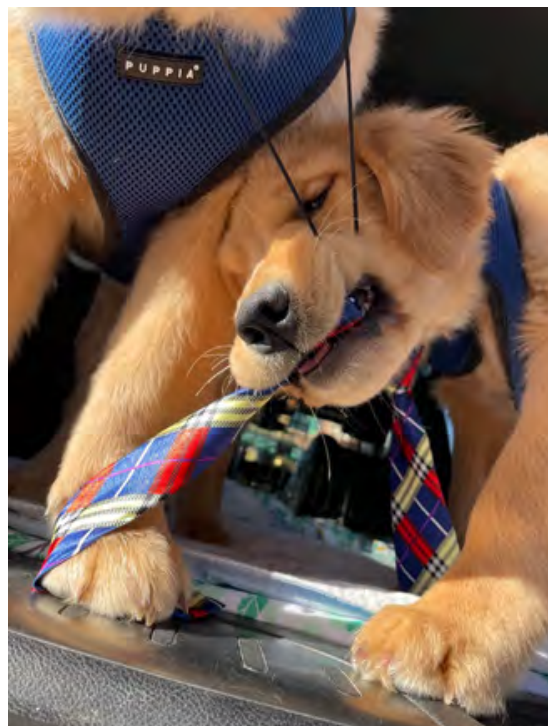

Let us know if you would like to join us for the trips to get the queasy treats. We would be more than happy to share the queasy treats with you!

We love you with all of our heart!

Love always,

Meadow and MM3
We love you for infinity!

Hello Everyone!

It's Mayor Max!

I want to share with you a story about Huey and Dewey, two hummingbird friends of mine. I love them so much. I am even practicing to fly like them so we can fly around together. How fun!

Huey and Dewey come to visit me all the time. They know how much I love cookies, so sometimes, when Phyllis and Glenny aren't looking but they are baking cookies and they have left the cookies out to cool on the cookie rack, Huey and Dewey will fly in an open window and grab a piece of a cookie and fly away with the cookie to bring it to me. They really know how much I love sugar cookies, and they like to taste some of the sugar as well.

Huey and Dewey love visiting their flower friends every year because the flowers always come back, and it's always so fun to see them like old friends. The flowers are always very giggly because the vibration of the hummingbirds is very tickly to the flowers so you always know where the hummingbirds are by which flowers are laughing and giggling.

Huey and Dewey are very close friends with the tulips. The tulips have a special hummingbird bed in the giant tulips so when Huey and Dewey get tired, they can actually fly into a giant tulip and go to sleep and rest. The tulip cuddles them and closes up its petals a little bit so that Huey and Dewey can rest without worrying about anything. So in the day, when you see a giant tulip that is closed a little bit, if you look inside, you just might find Huey and Dewey taking naps.

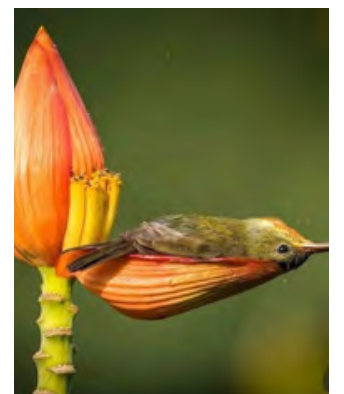

When Huey and Dewey are napping in a giant tulip, they love to feel the warm sun on their faces and the gentle breeze that slightly moves their feathers. It's very peaceful, and the tulips sway back and forth and rock Huey and Dewey gently to sleep. It's a very serene moment, and nature takes care of the hummingbirds this way.

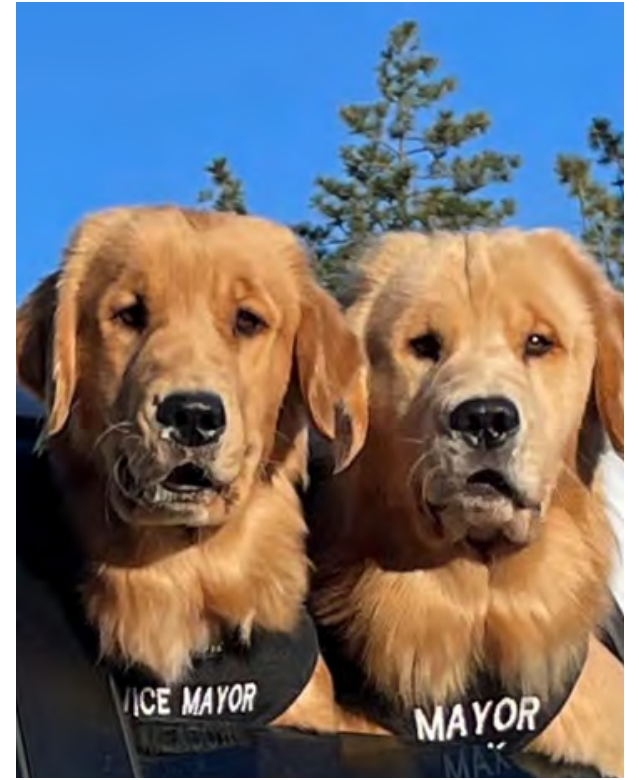

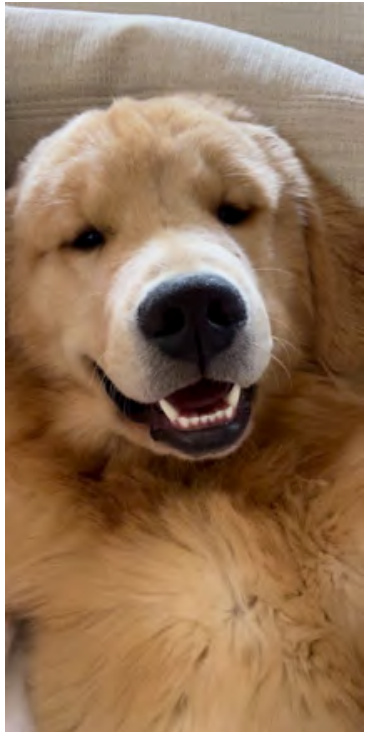

Huey, Dewey, and I love you with all our heart.

Love always,

Mayor Max

Hello Everyone! It's Mayor Max and Vice Mayor Meadow

**Be loyal and true in all that you do!
Be very grateful and recognize what you have.**

From the Declaration of Independence:

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. –That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, –That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness...

...But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security.

We love you with all of our heart!

Love always,

Meadow and MM3
We love you for infinity!

Hello Everyone! It's Vice Mayor Meadow!

An interesting night has happened! It started out with Phyllis deciding to have a giant piece of chocolate cake with four layers of frosting and a giant wedge of dark chocolate just before going to bed. She may as well have taken two boxes of NoDoz. Her heart was racing, and there was no chance of her going to sleep.

So she decided to stay up and get some work done.

But then the power went out while it was still dark, so she decided to work on her phone instead that was fully charged.

Only one problem: Every insect in the universe came flying over to her lighted cell phone, and while we Mayors are not fazed by bugs in any way, Phyllis became a screaming, whirling dervish.

Then she decided that maybe she would be safe if she went into the bathroom to work and closed the doors. No luck! There were bugs just waiting for her everywhere.

We heard her screams from every room in the house! Every single room in the house had multiple bugs ready to pounce on her in seconds.

Still determined to keep working, she thought maybe if she put a giant sheet over her head and body, she could protect herself from the bugs. But it turns out that the really big bugs, like a giant beetle that was in the house with its relatives that night, went flying into her head even though she was under a sheet. These giant beetles whacking her head made her scream just as much.

It was like watching a giant arm-waving Halloween ghost running around in the living room. We Mayors were uncontrollably laughing.

Fortunately for us Mayors, the house is equipped with motion sensors that, in the event of a power outage, turn on a nightlight at the electrical outlets wherever they are located. One of them was right where we Mayors like to sleep at night, and we love eating moths! We figured out pretty quickly that as long as we kept moving, we had an endless supply of moths to eat.

This made us thirsty though, and Phyllis then had to refill our water bowl. No problem. We attacking Phyllis. She's like having a large stuffed animal Donald Duck walking around the house complete with feathers! We go wild!!

It was a fun night of eating moths, attacking Donald Duck, and watching an illuminated Halloween ghost run around the living room! None of us Mayors got any sleep either!

That's OK. The sun finally came up, and we decided to nap after a long night of no sleep. However, Phyllis was still wide awake experiencing the consequences of eating too much chocolate (aka: NoDoz) before going to bed! LOL

Photo by Cara Addis

Still, there was no power at 7 AM. The power company, though, did call to let us know the power was out...like we couldn't figure that out! OK! Well, their heart was in the right place.

This is a true story!

In all the excitement of the evening, we Mayors decided it would be fun to dress up as ghosts this Halloween. We wanted to get a great picture of the four of us Mayors posing together, and we hope you love the photo of the four ghosts. This is what we are supposed to look like, but having those sheets on our heads made us so frisky that we jumped all

over the place and pulled off and shredded the sheets. There are no more linens left in the house! Still, we really wanted to get this photo, so we asked some well-behaved Golden Retrievers we know to pose for us. Hopefully, it won't get out over the Internet that our friends had to stand in for us.

Love always,

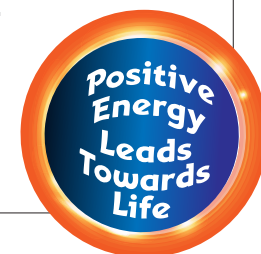

Vice Mayor Meadow and The Mayors of Idyllwild

Hello Everyone!

It's Deputy Co-Mayor Mikey!

I thought you might like to know a little bit more about me. I really enjoy my job as the Deputy Co-Mayor of Idyllwild, a job I share with my sister, Deputy Co-Mayor Mitzi.

I love life so much! It is so much fun!

One of my favorite things to do is to romp around our property in the snow. It doesn't snow that often, but when it does, we Mayors are out in it!

Last year, there was one day where we had so much snow that the rocks and low bushes were fully covered with snow, and you couldn't tell what was under the snow.

While I was out running around, a rabbit darted out in front of me, and I had to chase it. But the rabbit jumped underneath one of the mounds of snow. I jumped on top of that mound only to find out the hard way that I had jumped on top of a giant cactus plant.

THE Cactus

I got stuck on the cactus plant like Velcro, only it was a pretty prickly Velcro. I could hear the rabbit laughing underneath the cactus. I finally was able to free myself, and I felt a bit like a pin cushion.

I then ran over to Phyllis who thought I looked kind of funny as I was approaching. She put her hand out to see what was hanging from my fur, and it was a bunch of cactus plants. She let out quite a bleat! I was more stoic. LOL

I was fine, thankfully, and it actually made me laugh to hear the rabbit laughing at me. I wasn't seriously hurt, but Phyllis did get a few pin pricks!

I am also the best hole digger in the family of us Mayors. I will dig down three feet or more in a short period of time, and I can promise you that you will always get to see all the irrigation piping at our home. I will even chew the pipes and break them apart. Just come on over and you will see the irrigation piping remnants all over the property!

I also love eating food so much, and I fantasize about going to the Dairy Queen all the time. There's nothing more exciting than the anticipation of waiting to get through the drive-through line and get a big reward! Phyllis always gets us a vanilla ice cream cone!

I have a kind and loving heart, and if you pet me, you will see how much I like it. I really like belly rubs too. In fact, Phyllis calls me the belly rub boy!

Come and visit me when we are downtown. That is at 4 PM on Thursdays and Fridays, 2 PM on Saturdays and Sundays, and Monday through Wednesday by appointment. You will find us parked at Wooley's! You can always invite me to your birthday party too. I would love to celebrate your birthday with you.

I love you with all my heart!

Love always,

Deputy Co-Mayor Mikey
The Feisty

Positive Energy Leads Towards Life!

Hello Everyone! It's Mayor Max and Vice Mayor Meadow!

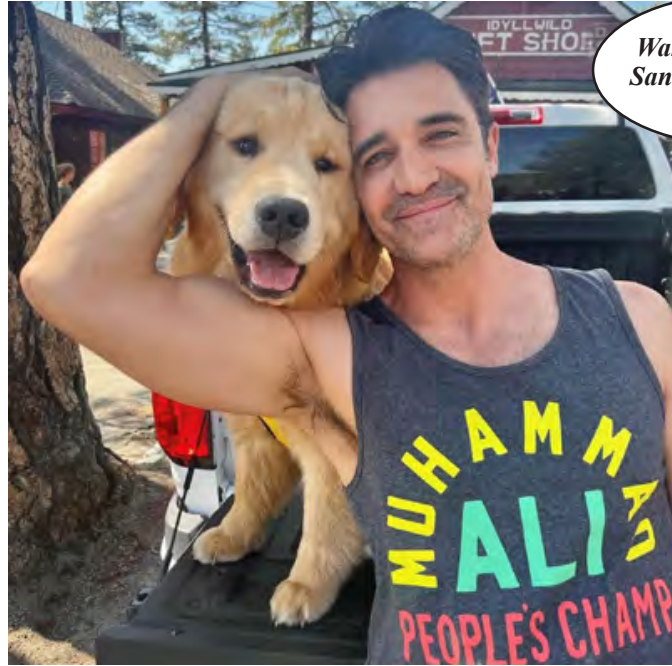

We want to share with you a holiday story from our dear friends, Pipsy and Squeaky!

Hi there! We are two holiday mice, Pipsy and Squeaky, and we are great friends with the Mayors of Idyllwild. They like to chase us on their deck, but when they catch us, they are very gentle and just carry us around for awhile. We climb up on their noses to have conversations with the Mayors, mostly about how we all love delicious food. They go a little cross-eyed looking at us while talking, and that's pretty funny to see. They talk about Dairy Queen visits, and we talk about table crumbs, especially at the holidays!

We live next door at the Mayor's neighbor's house. We love the holiday season, especially Christmas Eve. We always get the crumbs left after Santa eats his cookies. This may not sound like much to you, but for our little tummies, it is quite a lot of food and very filling.

We get so excited in anticipation of our holiday feast. One year, though, the dear neighbors we live with were out of town, and so they didn't put out cookies for Santa. We went to bed hungry that night but still thankful for everything we did have, like each other. We snuggled up that cool night and slept peacefully and comfortably on a nice array of things we have collected from the house over the years. Though our tummies growled, we fell sound asleep.

Our Dear Friend, Gilles Marini

Then, guess what happened! When we awoke, there was a giant sugar cookie right by our bed with a note from Santa. It said:

Thank you for cleaning up all of my crumbs

You two are better at it than most anyone

And thank you for being my friend over all the years

May this cookie bring you great holiday cheer!

I love you with all my heart, Santa

Oh what happiness. We dined on that sugar cookie for two weeks!

We love you with all of our heart too!

Love always and Happy Holidays!

Pipsy and Squeaky

Dear Mayor Max & Family, I am not local to Idyllwild, but would really love a 2024 calendar if possible, please. I just have to add that your Facebook page and the calendar are so wonderful!

You bring a smile to my face daily, you spread joy worldwide, and you truly live the POET message! I so appreciate all you do, and was inspired upon receiving & reading my calendar this year to stop visiting a celebrity gossip webpage that was not very nice.

Only spreading love spreads positivity! Thank you from the bottom of my heart. Warmest Regards,

🐾🐾🐾 *Gretchen Kiley* 🐾🐾🐾
